

Java

```
class Solution {  
    public int maxSubarrayLength(int[] nums, int k) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number[]} nums  
 * @param {number} k  
 * @return {number}  
 */  
var maxSubarrayLength = function(nums, k) {  
  
};
```

C++

```
class Solution {  
public:  
    int maxSubarrayLength(vector<int>& nums, int k) {  
  
    }  
};
```

C#

```
public class Solution {  
    public int MaxSubarrayLength(int[] nums, int k) {  
  
    }  
}
```
